Abstract

Various objects that human society has a popularity, accepts, believes or faith in them. As a result, those objects be precious and people in society compete for possession. Because all people have needs. It can be used as an ornament, show rich and owner's taste. It can be used to trade with other valuable objects. Some objects are unique, few and rare. Including, age of objects through time since it was built to the present. It's something of great value. It shows the story of the past very well. The time and faith accumulated in those objects make it powerful. These things are valued much higher than fiat currency. For example, amulets, sacred objects, antiques, gems, meteorites, and some element.

Buddhaambhorn Amulets was founded for support the collection and trading of materialism. We have expertise in Thai amulets. Our main goal is to promote these objects to be valuable on a global level. Which in Thailand and Southeast Asian countries. Thai 's amulets are very popular to be desired and It is recognized as being of high value. Nowadays, the physical world has advanced tools and technologies. So, it's easy to fake, copy or duplicate. Which is a problem of the amulet's hoarder. Although we can fix these problems by using professional organizations. Including those who have experience with knowledge about amulets and antiquities to prove and we guarantee the value of those items. But there are still risks. It is an inspection issue under the warranty contract. We cannot build credibility in the value of those objects to a global level. For this reason, we have initiated the Buddhaambhorn Amulets Museum protocol project. By taking advantage of NFTs and blockchain technology. which is a technology that is internationally accepted. That it can effectively prevent duplication. It is strong and high performance.

Buddhaambhorn Amulets Museum Protocol project is connected to the digital assets using the contract of NFTs. And the owner of the contract is owning true physical assets that cannot be counterfeited. Information about the identity of a physical objects will be stored in a database. All about that are open to the public. Benefit to the owner and holder. Exhibited for the general public to see. You can bid, trade and exchange all assets. People in the physical world can benefit. It is truly decentralized financial system. Blockchain is the ultimate technology.

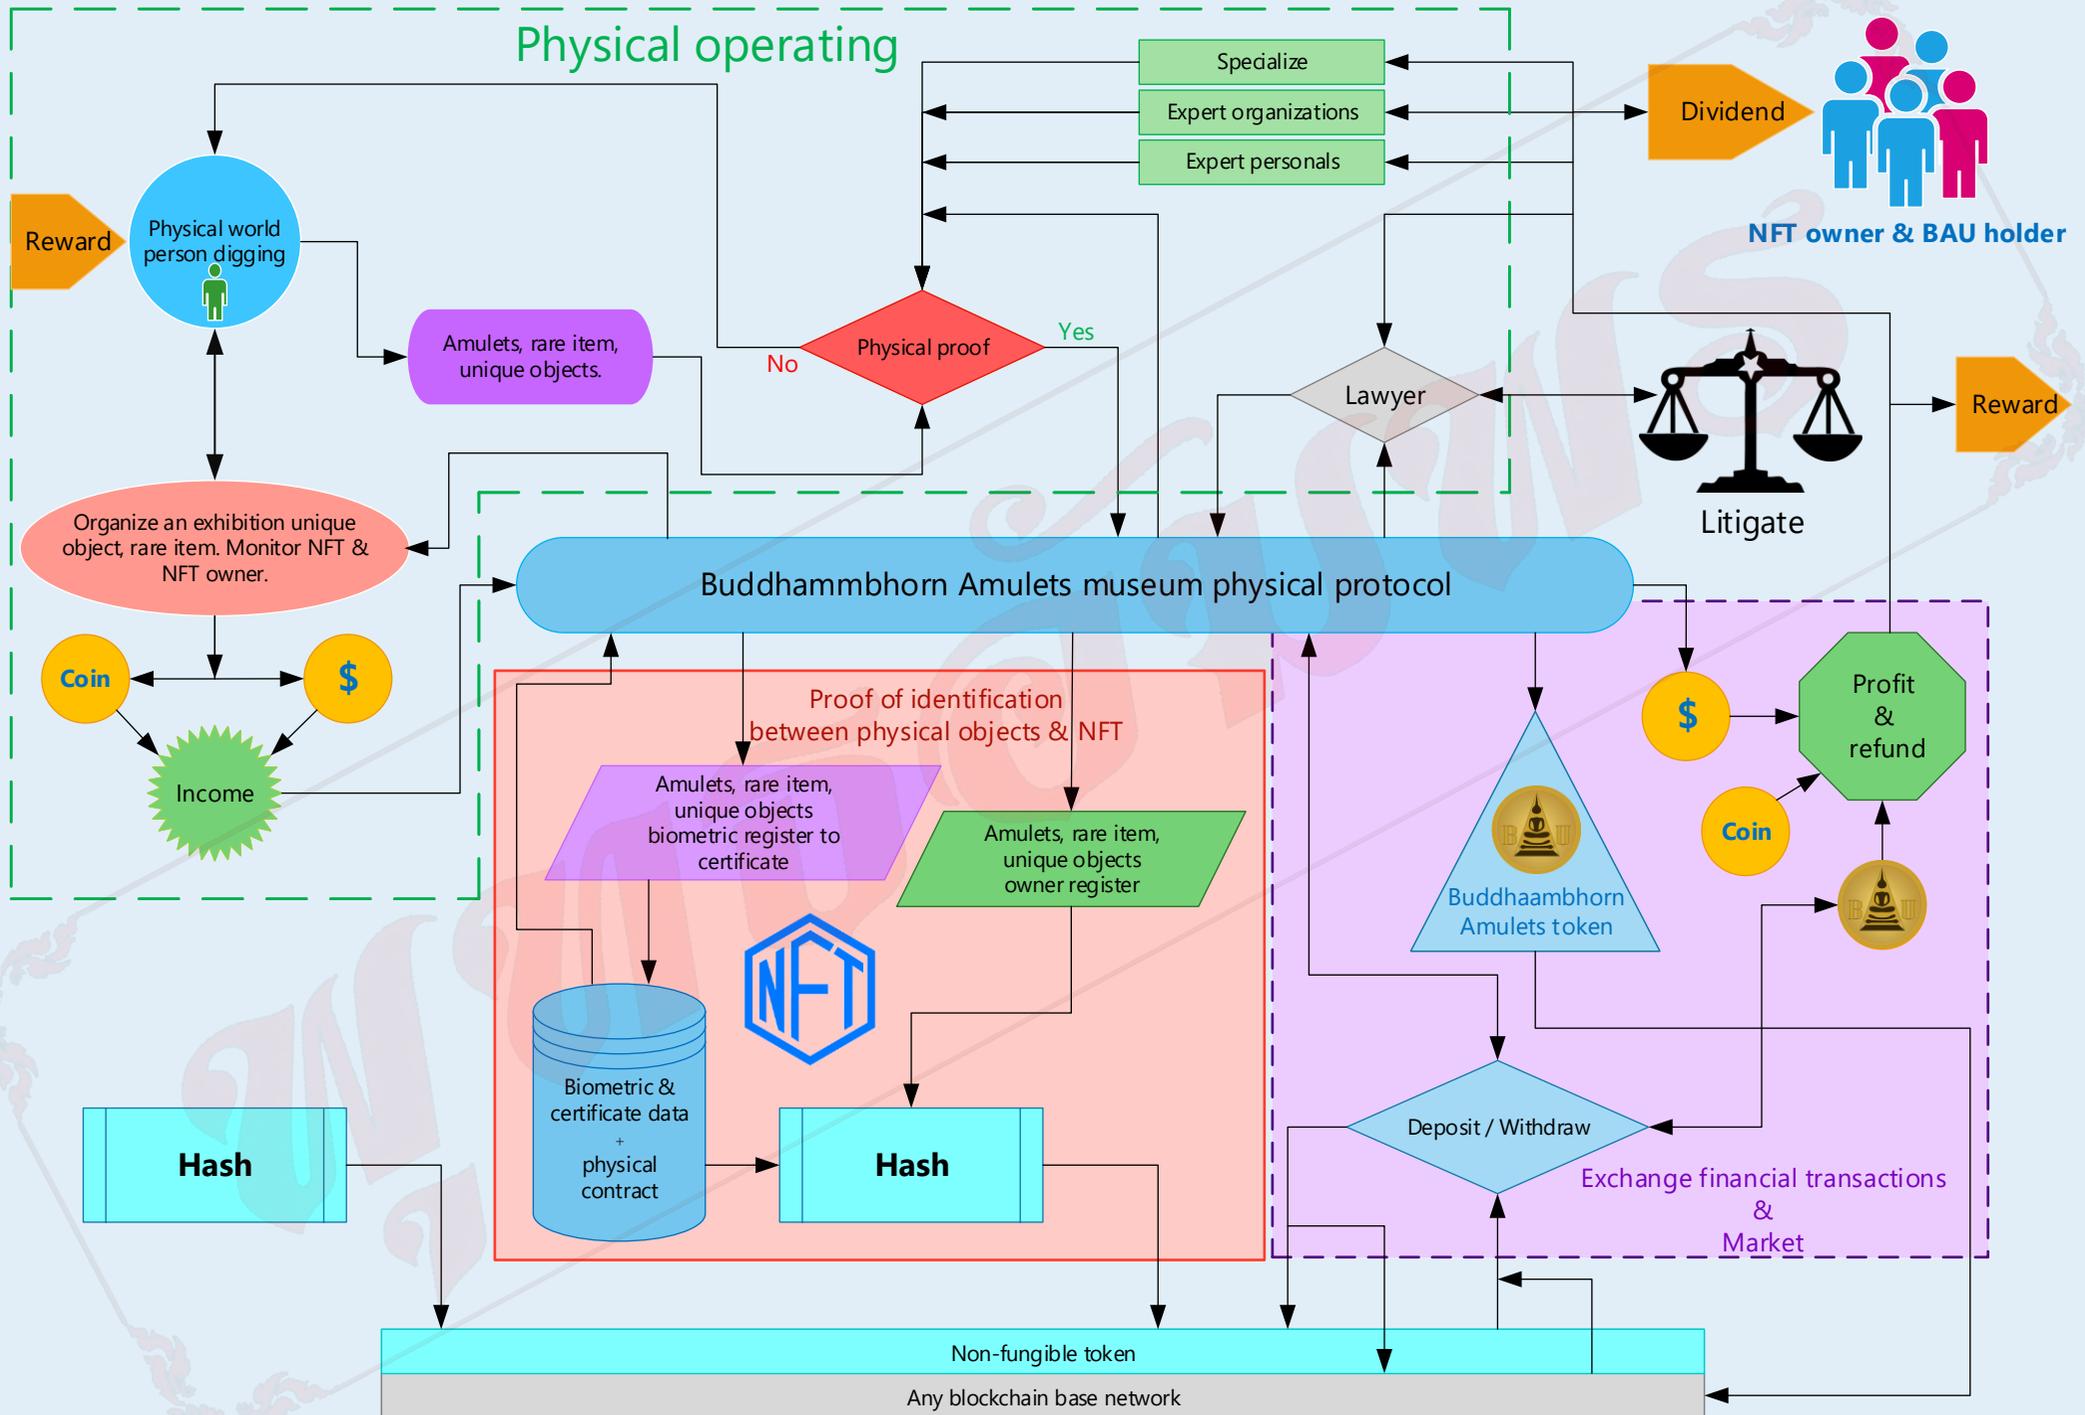

1. Introduction

Nowadays, technology has developed rapidly, beyond the ordinary people's way of life in the physical world to catch up. Digital asset owners are still in the digital world. Which is physically intangible. To be accessible, technological knowledge is required. For example, ownership of an NFT (Non-fungible token) is still the abstract treasure owner. Although a portion of the proceeds will be returned to the original owner every time a sale occurs. If no trading takes place, the holder will not receive any benefit. And they do not own any tangible objects in the physical world. Therefore, digital assets fall under this limitation.

The rapid development of digital technology causing changes in every aspect of human society. Every organization uses intelligent technology to achieve operational goals. Including the advent of artificial intelligence. As a result, people in the physical world must adapt to keep pace technology. Increased convenience in exchange for lower income for most people, who don't have access to technology. And those people are under the control of financial centers. Most human beings still cling to tangible objects. These limitations are still a problem. causing imbalances in terms of economy, society and governance. All of them made people more interested in precious objects. It's like finding treasure to be a factor in raising life. So, we would like to be part of solving these problems. To generate income for the local people and give everyone access to both assets.

2. Process and method

The working process of the system is divided into two parts, physical and digital. Connected by Buddhambhorn Amulets museum physical protocol. Which we will provide services for create, exchanges, deposits and withdraw the NFTs on the any blockchain base network. By using BAU (Buddha Mantra Coin) which has a limited amount for holders and investors to be partners. BAU holders and depositors (NFTs owners) will receive dividend income from operating profits.

2.1 Physical operating

All physical operations are performed as an organizational system. Organize exhibitions and exhibit assets in the museum, to generate income and disseminate knowledge to the general public who are interested.

2.1.1 Personal digging

People will find tangible materialism, such as treasure hunting, and send them to us for screening. After that, the object is sent for inspection (Physical proof) and issuance of a certificate by a specialist or an independent specialized organization. And then sent to the identity collection process. To differentiate, we use digging instead of mining.

2.1.2 Organize an exhibition

An exhibition of ownership rights and property of the depositor. Including, the opening of the auction, trading, exchange of that property.

2.1.3 Lawyer

Set up international legal agencies to support credibility and fairness.

2.2 Proof of identity between physical objects & NFTs

Bring a qualified object to register the credentials and store it as a database for verification. Along with granting the physical ownership of that object attached to a legal contract in the physical world. After that, the data will be generated as NFTs.

2.3 Exchange financial transactions & market

All management software is open-source, verifiable. The system will support the following coins. More coins will be added over time. We generally will only add coins that have strong credibility, user base, and liquidity.

2.3.1 BAU (Buddhaambhorn Amulets coin)

2.3.2 BTC (Bitcoin)

2.3.3 ETH (Ethereum coin)

2.3.4 NFT (Non- fungible tokens)

2.3.5 BNB (Binance Coin)

2.3.6 ADA (Cardano Coin)

3. BAU (Buddhaambhorn Amulets coin)

We will issue our token coin, called the Buddhaambhorn Amulets coin. A strict limit of 84MM BAU will be created, never to be increased. BAU will run natively on the any blockchain.

3.1 Allocation

Divided	Amount (BAU)	Participant
44 %	36,960,000	ICO
40 %	33,600,000	Founding & Programmer Team
12 %	10,080,000	Angel investors
4 %	3,360,000	Charity

3.2 ICO

The ICO will be done in BTC ADA and ETH, on multiple platforms around the world.

4. Project start

Finding startup capital to build a physical organization.

4.1 Firth NFTs

The first image file of the amulet will be converted into Non-fungible tokens and will be open for bidding. The winning bidder can contact to claim the real item by yourself.

This is a sample image. (Real picture, no watermark.)

4.2 Recruit programmers

We need programmers who are truly competent and understand blockchain. Along with Ideology, commitment, honesty for the quality and reliability of the project. If you have such ualifications, please contact us.

buddhaambhorn@gmail.com, line ID. Buddhaambhorn and <https://www.facebook.com/BuddhaambhornAmulets>

4.3 Plan & create an application

The creation of the software will take place after we assembled a team of programmers. Sauce-code will be publicly available.

5. Fundraising

Make BAU coins and send them to the market for an ICO (See details in section 3.1).

However, living humans still need treasure. Both tangible and intangible. We provide a tool to help your needs come true. We work with integrity, rules are clear, all can be verified. And be confident in sauce-code.

Please follow us on our website.
